Work Experience

Software Developer | WALDEN.AI
Mar 2022 - Present

• Led the development of an efficient data collection system, significantly enhancing the company's ability to gather valuable information.
• Elevated the main application's visual quality and user experience by implementing a professional and coherent design.
• Designed and implemented large-scale geolocation and data analysis tools for Spanish municipalities, optimizing municipal resource management.
• Spearheaded an agile team in the rapid development of a web application for a marketing event, integrating payment functionalities and boosting Walden platform adoption.
• Demonstrated technical versatility, working with a diverse stack including Python, Go, React, and AWS services to create comprehensive and scalable solutions.

Freelance Developer
Jan 2024 - Present

• Developed key skills in client relationship management, learning to effectively interpret and satisfy specific client needs.
• Perfected project negotiation and budgeting capabilities, ensuring satisfactory outcomes for both clients and my professional practice.
• Delivered complete and customized web solutions, from conceptualization to implementation, demonstrating technical versatility and results-focused approach.
• Enhanced independent project management skills, consistently meeting deadlines and quality expectations.

Frontend Developer | RENVANCE
OCT 2024 - Present

• Led UI/UX improvement initiatives, implementing intuitive and attractive designs that significantly elevated the user experience across multiple application views.
• Executed comprehensive frontend code refactoring, improving readability and maintainability, resulting in reduced development time for future updates.
• Optimized application performance through efficient component implementation and adoption of frontend development best practices.
